SHREYASH SOMVANSHI

DevSecOps Engineer

shreyash.rbind.io | shreyashsomvanshi03@gmail.com | GitHub | LinkedIn | +919730681363 | Pune

Introduction

I am a DevSecOps engineer with ~2 years of experience building and maintaining secure, cloud-native, scalable infrastructure. I work across automation, containerization, orchestration, CI/CD pipelines, and monitoring while always keeping security at the forefront. I effectively communicate across cross-functional teams and conduct thorough root cause analysis to detect and troubleshoot issues. I approach problems methodically, grasp new skills quickly and take responsibility for my work.

Professional Experience

Software Engineer (DevSecOps) **Nov 2024 - Aug 2026**

Capgemini Technology Services India Limited *Pune, Maharashtra*

- Configured & managed Jenkins CI/CD pipelines for deployment of Java microservices on Amazon EKS and ECS.
- Worked collaboratively with the developers to trace & investigate the application execution & error logs, RCAs, other issues.
- Ensured the security & compliance aspects using tools like Gitleaks, SonarQube, Snyk SCA & Container Security, Qualys.
- Automated uploading of daily security reports to confluence space, & reduced manual efforts.
- Regularly analysed the security scan reports & collaborated with the developer teams to mitigate or resolve the detections.
- Frequently monitored the application status, Kubernetes cluster status, resource utilization metrics.
- Architectured an end-to-end CI-CD workflow for an Agentic AI application using GitHub Actions, Podman, AWS ECR, EC2 & implemented run-time secrets ingestion approach to manage the API keys securely, also ensured high availability & minimum downtime rollback approach.

Skills & Competencies

Programming:	Python, Bash Scripting, Go
Cloud Tech:	AWS, (basic familiarity with Microsoft Azure, GCP), Platform Engineering
CI/CD:	Jenkins, GitHub Actions, ArgoCD, GitOps, MLOps
Containerization:	Kubernetes, Helm, Docker, Podman, OpenShift
Logs & Monitoring:	AWS CloudWatch, AppDynamics, OpenSearch, Grafana, Prometheus
IaC tools:	Terraform, Ansible
Security tools:	Gitleaks, Snyk, SonarQube, Qualys, OWASP, Trivy
Databases:	PostgreSQL, MongoDB, MySQL
A.I. tools:	Kiro, Copilot, n8n, Agentic AI, AWS DevOps Agent, RAG, LangChain, LangGraph

Projects

AWS Infrastructure Automation & Deployment Strategy Github

- Designed a modular AWS infrastructure using Terraform, featuring multi-AZ Auto Scaling Groups, an ALB, and secure SSM-managed instances.
- Engineered a zero-downtime deployment mechanism using ALB weighted target groups to execute seamless canary rollouts and instant cutovers.

Ads Platform (guided) Github

- Provisioned AWS infrastructure using Terraform, including VPC, ECS/Fargate, ALB, ECR and RDS.
- Built Docker-based CI/CD pipelines with GitHub Actions for automated ECS deployments.
- Implemented CloudWatch, Grafana monitoring and alerting for application and infrastructure observability.

Education

Bachelor of Engineering in Artificial Intelligence and Data Science, *Savitribai Phule Pune University* 2020 - 2024

Minor in Cybersecurity (2022-2024)

Vidya Pratishthan's Kamalnayan Bajaj Institute of Engineering and Technology, Baramati 8.44/10

Certifications & Coursework

- AWS Certified Cloud Practitioner — Verify
- Kubernetes Cluster Lifecycle Management in Platform Engineering — Validate
- Introduction to Platform Engineering — Validate
- GitHub Foundations — Validate
- LFS167: Introduction to Jenkins — Validate
- LFEL1014: Scaling Cloud Native Applications with KEDA — Validate
- Fundamentals of Ansible (RedHat) — Validate
